SUMMARY:

- Software Developer with expertise in JavaScript and React.js, experienced in integrating RESTfull APIs and creating exceptional and innovative UIs.
- Proficient in object-oriented programming with strong analytical and problem-solving abilities.
- Excellent written and communication skills in English.

TECHNICAL SKILLS:

- **Languages** : JavaScript, Python, Typescript(basic), HTML, CSS
- **Framework** : ReactJS, NextJS
- **Tools** : Postman, Figma, Microsoft Office Jira, GIT, Github
- **Backend** : Firebase, Appwrite

WORK EXPERIENCE:

Frontend Developer - Codeaspire Consulting Services

| Nov 2023 - Present

- Convert designs and wireframes into high quality scalable code with pixel perfect responsive UI.
- Integrated Rest APIs, along with 3rd party APIs including Google Maps Geolocating API and Razorpay payment methods, and provide solutions.
- Upgrade and scale frontend codebase along with significantly improving user satisfaction ratings.
- Managing the runtime of AWS EC2 instances for cost-effective savings.
- Mentoring interns and colleagues, and participate in intern hiring technical interviews.

PROJECTS:

Ecommerce-Website - [[Reactjs](#), [Firebase](#), [ReduxToolkit](#), [Stripe](#), [Tailwind](#)]

[Link](#) | [Github](#)

- This project is a full ecommerce website with integrated Admin Dashboard for small businesses.
- **Stripe Integration**: Handles full customer flow from cart to payment and order requests.
- **Admin Dashboard**: Manages users, products, and orders with role-based routing and authentication.
- **Optimized Performance**: Utilized lazy loading, code splitting, React Hook Form, and Yup.
- **Firebase Backend**: Uses Firestore, Firebase Storage, Firebase Auth, and Cloud Functions for backend operations.
- **Secure Operations**: Executes crucial backend logic functions in the cloud with Firebase Cloud Functions.

FullStack Blog website - [[Reactjs](#), [Appwrite](#), [TailwindCss](#), [ReduxToolkit](#)]

[Link](#) | [Github](#)

- This project is a small Blog website built with Reactjs & Appwrite for backend.
- **User Management**: Features secure authentication and handles multiple user roles.
- **Content Control**: Implements full CRUD functionality for managing blog posts and user data.
- **Scalable Design**: Built with scalability in mind, ensuring production-grade performance.

Todo-Firebase - [[Reactjs](#), [Redux](#), [tailwind](#), [Firebase](#), [Typescript](#)]

[Link](#) | [Github](#)

- Todo-Firebase is a responsive React web app for managing tasks, with full **CRUD** operations and **user authentication**.
- The project uses **TypeScript**, **Firebase** (Firestore for CRUD, Auth for authentication), ensuring scalability and performance.

EDUCATION:

Bachelor's degree in Computer Applications

| Sept 2020 - June 2023

CSJM University, Kanpur
